

Topic: Mirror Images

Resources: For each team, a ready-made model of part of a flower.

For each child, a 12x6 plate; 2x2 bricks that match in number and color those in the flower pattern.

Funded by
the European Union

Activities:

1. The teacher gives the example and construction materials to the teams.
2. The teacher asks the teams to build a mirror image on one of the plates.
3. The teacher checks that the children have succeeded. They must now build a mirror image of the plate just completed; and then mirror that one on the final plate
4. The teacher asks each team to put their plates together to make a flower.
5. The teacher checks that the children have succeeded.
6. The teacher tells the children to dismantle their models, placing the bricks neatly on the table. Each team should now create its own mirror image model. They should start by making, on one plate, the pattern to be mirrored on the others
7. Each team shows their mirror image model to the others.
